Enroll online: <https://www.achidta.org/EBForms.aspx?EBID=1235>

Our experiential training platform has been strategically designed to help you and your teams become more effective and efficient in a unique way. Through our training workshops, we support your team in skills like problem solving, leadership and communication skills through Emotional Intelligence based experiences and activities. We also build on engagement and cooperative skills to support long term “culture change” and impact within communities. In addition to the experiential training, we also incorporate the GPS for SUCCESS™ Drug Prevention Programming for communities and schools. The GPS for SUCCESS™ prevention programming focuses on 5 core principles: Vision, Mission, Purpose, Team and Commitment.

Our Experiential Training is designed to prepare the law enforcement, educators, community members, and public health and safety workers with interpersonal skills that better equip them in being effective mentors in their communities. Each experience is tied to a scientifically researched or Emotional Intelligence (Social Emotional) based concept that can intrinsically build skills such as: resiliency, self-awareness, self-esteem, self-efficacy and purpose of life. Building ones inner-self is the building block for our Training Platform, because we ultimately believe that we need to empower ourselves to empower others.

Your contributions to your team, your family, your community and the world are writing your legacy of significance. We are honored to share with YOU these powerful teachings to impact the lives of countless men, women and youth.
